

## Claims

What is claimed is:

1. Golf Training Device comprising:

a golf club comprising;

a standard golf club handle portion;

a shaft portion;

a head portion; and

said head portion shaped like a concave hemispheric scoop that can removably retain a golf ball.

2. Golf Training Device as claimed in claim 1 wherein the top of said shaft has external threads that can interface with internal threads located in the bottom of said handle so that the user can adjust the overall length of said golf club.

3. Golf Training Device as claimed in claim 1 wherein said shaft portion is bowed and can be constructed of a semi rigid material that can flex slightly when the user pitches a golf ball toward a target.

4. Golf Training Device comprising:

a golf club comprising;

a handle portion;

a shaft portion;

a head portion; and

said head portion shaped like a concave hemispheric scoop that can removably retain a golf ball where said golf ball is constructed of a soft material such as foamed plastic so that said ball does not cause damage when used in close quarters.
